For Immediate Release

Acrylatex Coatings Partners with Bellflower Paint as Local Retail Distributor

New retail paint store now carrying renewable and reusable products.

May 22, 2012 – Acrylatex Coatings & Recycling, Inc. a certified Southern California latex paint recycling and manufacturing facility has announced that they will have another retail outlet which will carry their line of recycled paint and related recycled paint products. Bellflower Paint, located at 17314 Woodruff Ave, Bellflower, CA, has just completed a 4,000 sq ft renovation their retail and warehouse space and as part of that renovation process, they have expanded an area to showcase Acrylatex's recycled paints.

President of Bellflower Paint, Mr Chris Moxon, who has over 30-years' experience within the residential and commercial painting industry was asked about his thought of adding the Acrylatex product line to his store. Chris said "I'm excited about finally being able to provide a quality, recycled paint. Going "green" is on everyone's mind these days and being able to offer products that rival name brand virgin paints is something we believe has great potential. There's always been a demand for lower cost paint, but when that paint also is recycled and applies to surfaces as good as virgin paint and is cheaper... we can only anticipate it is going to be well received by many of our painting contractors."

Bellflower Paint will stock a complete line of Acrylatex's Life Cycle architectural latex paint, which comes pre-colored in over 20 different shades (no-tinting required) and in flat and semi-gloss sheens. Other Acrylatex products manufactured from recycled content will also be available from this retail location; Egduls asphalt sealer, BinCoat DTM metal coatings, Tag Out graffiti cover up and Azusa Soft Rock, a decorative landscaping ground cover.

Store hours and other information about Bellflower Paint can be found at their internet web-site: www.bellflowerpaint.com or by calling them directly at (562) 866-6300.

About Acrylatex Coatings & Recycling, Inc.

Acrylatex is a manufacturer of professional grade paints and other recycled products with their Southern California processing facility located just East of Los Angeles, in the city of Azusa. Acrylatex accepts only waste latex paints in any condition from all sectors of industry to produce viable "recycled" products that

were once dumped into our landfills and poured down drains. For more information about Acrylatex, their product line, or waste recycle programs, please visit www.acrylatex.com, or call them at (626) 812-0191.
